

Q1 2024
Quarterly report

28 May 2024

BEFORM's new facility at Hønefoss, Norway, under development

Comments from the CEO

During the first quarter, BEWI Invest stuck to its key priorities to build a solid platform for growth. Several of the group's portfolio companies, were exposed to challenging market conditions and a seasonally weak quarter. However, at the same time, the value of the two listed entities increased, resulting in an increase in the GAV/ NAV.

BEWI ASA, KMC Properties ASA and SinkabergHansen AS remain our three largest investments, accounting for 89 per cent of the Gross Asset Value (GAV).

At the end of March, GAV was NOK 6.9 billion, up from NOK 6.3 billion at the end of December 2023. Gross financing decreased by NOK 119 million, leaving us with an increase in Net Asset Value (NAV) of NOK 633 million.

The increase in NAV relates mainly to an increase in the market value of our two listed companies BEWI ASA and KMC Properties ASA.

For **BEWI ASA**, challenging market conditions combined with extra harsh weather conditions and an early Easter, impacted sales in the group's seasonally weakest quarter.

Although BEWI ASA is currently influenced by tough markets, the company delivered a solid operational performance in the quarter and are successfully adapting to the market conditions while at the same time positioning for growth.

We note that even if the markets remained weak in the quarter, the macroeconomic indicators are showing signs of improvement and regulatory drivers supporting BEWI ASA's circular business model remain strong. As a long-term industrial owner, we take a positive view of the expected development going forward.

SinkabergHansen AS also had a challenging first quarter, with low sea temperatures and unusually harsh weather conditions impacting fish welfare and growth rates. However, the outlook remains positive, with rising sea temperatures, high demand, and robust prices for Atlantic salmon, positioning the company well for future growth and stability.

At its general meeting on 27 May, SinkabergHansen resolved to distribute dividends of NOK 250 million to its shareholders based on the result for 2023.

KMC Properties ASA delivered another quarterly result in line with their target to reach a portfolio value of NOK 8 billion at the end of 2024. In the first quarter the company demonstrated a 20 per cent increase in rental income compared to first quarter last year, while operational expenses remained constant, leading to a 22 per cent growth in net operating income from property management.

At the end of the first quarter, **BEWI Invest** had close to NOK 350 million in available cash and credits.

All in all, the first quarter of 2024 was challenging, but we are confident in how we are positioned to take part in the industrial development within the markets we operate.

Portfolio development first quarter of 2024

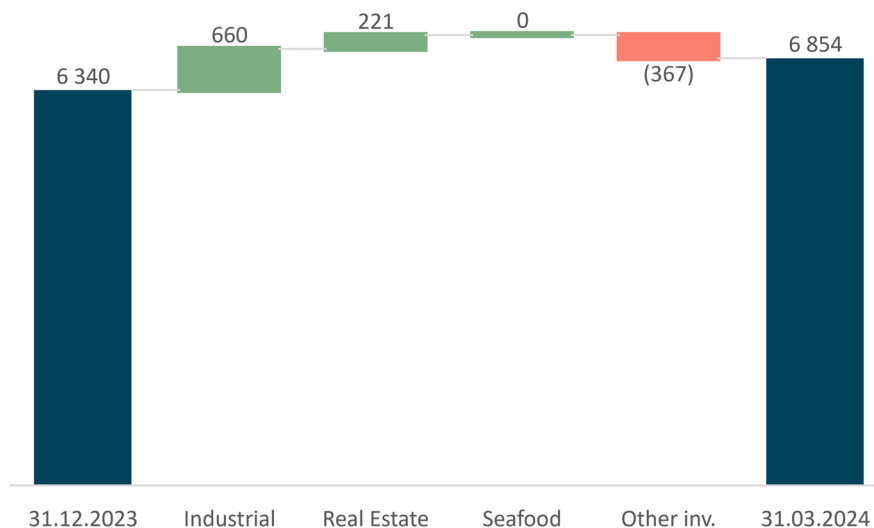

For the first quarter of 2024, the Gross Asset Value (GAV) of BEWI Invest increased from NOK 6.34 billion to NOK 6.85 billion. The higher GAV was mainly explained by an increase in VWAP of BEWI ASA from NOK 22.78 to NOK 29.51 per share, increasing the value of the Industrial segment by NOK 660 million.

The value of the real estate segment also increased as a result of BEWI Invest's purchase of additional 12 million shares in KMC Properties ASA, combined with an increase in VWAP from NOK 6.14 to NOK 7.12 per share.

The reduction in other investments is mainly attributed to a reduction in cash of NOK 532 million, offset by an increase in Financial Investments and receivables of NOK 165 million.

Change in Gross Asset Values

GAV and NAV are core performance indicators for BEWI Invest (see separate page with APM definitions). BEWI Invest's valuation of the ownership in the private salmon farmer SinkabergHansen (SBH), is based on positive underlying fundamentals, and strong value creation. Limited supply of Atlantic salmon, coupled with robust demand and a weak NOK, has led to high salmon prices, and strong results.

For the first quarter of 2024, the gross harvest volume was 6,285 tonnes (GWT). The gross operational farming EBIT per kilo was 27.9 NOK.
